More details on the Universal Human Rights Index and SDGs are available from uhri.ohchr.org/en/sdgs.

How are special procedures mandates linking their work to the 2030 Agenda? To find out, visit tinyurl.com/SP-2030.

Work of the International Human Rights Mechanisms related to COVID-19:

COVID-19 and special procedures
COVID-19 and Treaty Bodies

INTERNATIONAL HUMAN RIGHTS MECHANISMS

Reports prepared by and for international human rights mechanisms (Special Procedures, Treaty Bodies, Universal Periodic Review) carry a wealth of data and information relevant to the implementation of the 2030 Agenda and for COVID-19 response and recovery.

The most relevant country information since the adoption of the 2030 Agenda is featured below. You can find further information in the Universal Human Rights Index, OHCHR’s online database, which compiles recommendations from all human rights mechanisms for every country and allows searching through them by SDGs, SDG targets, affected groups and/or themes.

SPECIAL PROCEDURES

Since 2016, Azerbaijan has been visited by the UN working group on arbitrary detention and the UN Special Rapporteurs on human rights defenders and on the right to food.

Visit tinyurl.com/Special-Procedures for more information.

UNIVERSAL PERIODIC REVIEW (UPR)

Azerbaijan was last reviewed by the UPR in May 2018. The country received 259 recommendations and accepted 179 recommendations, touching upon a variety of SDGs.

Azerbaijan’s fourth UPR review is scheduled for October-November 2023, with the deadline for submitting the State report in July 2023. Systematically linking the VNR and the UPR reporting processes can benefit both reports and result in improved coherence in relevant policies, programmes and follow up to the 2030 Agenda, human rights agenda, and it can contribute to a successful COVID-19 response and recovery.

Visit tinyurl.com/UPR-AZER for more information.

OHCHR and the international human rights mechanisms have also developed COVID-19 guidance on particular issues, rights, and population groups, which can help assess risks, gaps and progress made, as well as chart a way towards building back better, greener, more equal, and more just societies. You can access this guidance from: ohchr.org/EN/NewsEvents/Pages/COVID19Guidance.aspx

The icons show which five SDGs received the most attention during the country’s UPR process (as indicated by the percentage of UPR recommendations corresponding to a specific SDG).

PROMOTING MEANINGFUL, SAFE AND INCLUSIVE PARTICIPATION

One of the central principles of the 2030 Agenda is the requirement for all its processes to be as participatory and inclusive as possible. Special efforts are often needed to reach out to those at risk of being left behind or not being heard.

Those affected by government’s decisions should be able to communicate their needs and interests as well as support tailoring, implementing and reviewing public policies and programmes. In the context of a global pandemic, ensuring meaningful and inclusive participation poses an additional challenge and burden on the VNR countries.

Guidance and practical recommendations on participation, developed by OHCHR and independent experts, aim to help secure inclusive, transparent and accountable SDG implementation.

HUMAN RIGHTS-BASED APPROACH TO DATA (HRBAD)

Data collection, disaggregation and analysis is a crucial tool for SDG implementation and reporting on progress made as well as for a targeted and effective response to COVID-19. However, devising disaggregation of indicators (or not) is not a norm or value-neutral exercise.

A human rights-based approach to data has much to offer. It can bring together relevant data stakeholders and develop communities of practice that improve the quality, relevance and use of data and statistics in line with international human rights norms and principles.

NATIONAL MECHANISMS FOR REPORTING AND FOLLOW-UP (NMRF)

Most States have established structures or processes for 2030 Agenda and for human rights reporting and implementation.

Systematically connecting these structures and making sure they work hand in hand will improve coherence and reporting quality as well as help secure greater participation and ownership. It will also ease reporting burdens and allow for sharing of information and analysis to make sure no one is left behind, including in the context of COVID-19.

NATIONAL RECOMMENDATIONS TRACKING DATABASE (NRTD)

OHCHR can, upon request, support States in establishing a national recommendations tracking database. This is an online tool available in English, Spanish, French, Arabic and Russian that facilitates recording, tracking and reporting on the implementation of human rights mechanisms recommendations.

The database is customized for the requesting country and can significantly ease reporting burdens under both human rights and sustainable development agendas, it can also facilitate assigning responsibilities and tracking progress.
