Our national legislation is free from any provisions to hinder women’s taking part in any cultural events, traditions or practices. The laws and other legal adjustments guarantee men’s and women’s free decision-making with regard to the issues that concern their lives. Moreover, practices built on suppressing and controlling women at times are available in social life due to mindsets based on gender inequality. Women’s participation in sports has increased dramatically in recent years. In 2009 the rate of women registered to the federation was 27% (449,046), whereas by the end of 2013 it rose to 30% (839,117) (Turkish Statistics Institute- TUIK statistics). This increase is considered to be a reflection of the successful infrastructural investments in Turkey and the role model set for girls and women by the achievements of our sportswomen in Olympiads and international competitions.

A review of “the rates of participation in outdoor cultural activities among the 15+ population in the reference month” demonstrated that only 1.6% of women went to the museums and art galleries, 1.8% to the theatre, ballet and opera and 2.6% to libraries while 6.9% of them went to the cinema.
